The Georgia Collaborative ASO
FY17 Frequency of Behavioral Health Quality Reviews

Quality Training Series
The timelines noted within are a representation of typical BHQR and CSU review frequency.

Adjustments, ad hoc and special reviews may still be conducted as needed.

The Quality Department will strive to have at least 6 months between reviews.
Typically, providers will be reviewed 1-2x per fiscal year.

Factors considered when determining BHQR frequency include:

- Provider tenure
- BHQR Overall Score
- BHQR Billing Score

CSUs may be reviewed more frequently than BHQRs if the CSU overall score indicates a need for additional review.
Frequency is based on both overall scores and billing scores from BHQRs in FY16

• Providers who have been in the DBHDD BH Provider Network for less than 2 years will be reviewed more frequently
Crisis Stabilization Units

- CSU Overall Score \( \geq 80\% \): 1x/FY17
- CSU Overall Score \( \leq 79\% \): 2x/FY17
- CSU reviews may be conducted as stand alone reviews if the provider’s BHQR scores indicate 1x/year review
Joint IDD/BH Quality Reviews

The Collaborative will continue conducting joint IDD/BH Reviews in FY17

Due to the difference in frequency of IDD and BH reviews, not all IDD/BH reviews can be conducted jointly.
